DETAILED ACTION

This office action is in response to the preliminary amendment filed on 09/10/2003. Claims 1-13 and 18-20 are pending for examination.

Specification

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant cooperation is requested in correcting any errors of which applicants may become aware in the specification.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-13 and 18-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 6,662,173. Although the conflicting claims are not identical, they are not patentably distinct from each other because:

Claims 1-13 and 18-20 of the present application merely repeat the features of claims 1-9 of US Patent No. 6,662,173 with fewer limitations. However, it is obvious for an ordinary skilled person in the art at the time the invention was made to remove limitations from a claim for the purpose to extend a more broader coverage of his/hers invention.

A telephone interview has been conducted between the examiner and applicant's attorney – Stephen T. Neal. The attorney agrees to file a terminal disclaimer as requested by the examiner to resolve the above double patenting issue.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: U.S. Patent No. 5,822,767 issued to MacWilliams et al., which discloses a memory bus signal extension system being shared between agents.
